

## Background

At Capri, we take tremendous pride in providing responsibly manufactured products. Since cork is a core product to Capri and is known as a rapidly renewable raw material, we are focused on providing sustainable products that are environmentally responsible and safe for indoor use. It is through these efforts that we are able to provide products that meet or exceed

industry certifications and contribute to LEED points. Below is a listing of the major certifications that Capri products meet and have been tested in accordance with, in order to show the information by criteria rather than by product.

## Certifications

CERTIFIED BY  
SCS Global Services

### VOC Emissions Certification

- AND/OR 2.0
- Fitness & Rec
- Sequel
- Twist & Twist XL
- Collegiate & Collegiate XL

PRODUCT CERTIFIED FOR  
LOW CHEMICAL EMISSIONS:  
UL.COM/ULGG

- Meditterra 2.0

### Post-Consumer Recycled Content

- Fitness & Rec
- Collegiate & Collegiate XL

### Pre-Consumer Recycled Content

- AND/OR 2.0
- Eco-Clicks Cork
- Muro
- Sequel

## Additional Information

### LEED v 4.1 Building Certification Credits

USGBC's LEED building certification system remains the most prominent building certification systems, even after it's most recent update to v4 and v4.1. When it comes to flooring products, LEED accreditation is commonly associated with Indoor Air/Environmental Quality. However, as of v4, the USGBC has added the Material & Resources credit, which adds requirements for material ingredients disclosure. All products that have a VOC Emissions certification can contribute to LEED Indoor Environmental Quality credits. All products that have a Material Ingredients Disclosure via Declare or specifically list Post-Consumer and/or Pre-Consumer recycled content can contribute to LEED Materials & Resources credits.

### mindful MATERIALS Listings

In addition to the certifications listed above, Capri is proud to announce that all of our products are listed in the mindful MATERIALS library, which consolidates all of the product-specific certificates and relevant sustainability information in one place for easy viewing. mindful MATERIALS is an organization that promotes manufacturing transparency and sustainability, especially as it relates to material ingredients, VOC emissions, material sourcing, and social responsibility.

**Capri is committed to sustainability and strives to provide environmentally responsible products through sustainable manufacturing and sourcing practices.
